## 1992 Family Income of In-state Oregonian Students

### Dependent Oregonian Students

Source: Oregon Family Resource Survey\*, August, 1995, pp. 6-8.  
 \* Conducted by Human Capital Resources, Chicago, Illinois at the instigation of OSSHE Chancellor Joe Cox and with cooperation from OCCA and OICA.

- 21 Less than half of families save for college. Savings are relatively modest and fall sharply at lower income levels.
- 22(10) Dependent family savings relative to college costs are substantial for c.c. students – actually *exceeding* c.c. costs for nearly half these students.
- 29 Cost savings for living at home *generally* range from \$2,000-5,000.
- 30 Parental-reported attendance costs are very similar to institutional estimates for calculating financial aid at public and private 4-yr. instis., but are *less than half* of the institutional estimates at c.c.'s – substantially overstating need for them.
- 38 Borrowing is *far* more prevalent at private instis. (65% of full-time students borrow an avg. of \$4,162) than at state instis. (41%–\$3,030) or at c.c.'s (8%–\$3,384). Averaged among *all* stdnts. (borrowers and non-borrowers) the avg. OICA stdnt. borrows \$2,804, the average OSSHE stdnt. borrows \$1,331, and the avg. c.c. stdnt. borrows \$238.
- 39 Grant aid is *far* more prevalent at OICA instis. (80% receive grants averaging \$6,450) than at OSSHE instis. (40%–\$2,648) or at c.c.'s (29%–\$1,789).
- 41 Net cost of attendance to family – even after all state, fed'l. instit'l. and pri. grant aid – is *still* \$2,000-5,000 higher at OICA instis. than OSSHE instis., and \$2,500-5,000 higher at state instis. than at c.c.'s.
- 42 Parent contribution as percent of family income ranges 4% at c.c.'s, 9% at OSSHE instis., and 13% at OICA instis.
- 43 Regressive funding is apparent as low-income families contribute *twice* the proportion of family income than do middle-income families, and *four times* the proportion contributed by upper-income families.
- 45 Family debt (stdnt. and parent combined) is *twice* as high for OICA stdnts. than for OSSHE stdnts., and *eight times* as high for OICA stdnts. than for c.c. stdnts. 44% of OICA families assume annual debt of \$4,000 or more, compared to 16% of OSSHE families and only 4% of c.c. families.
- 67% of OICA families borrow for college (40% of OSSHE families and 14% of c.c. families.) 27% of OICA families borrow more than \$6,000 a year, compared to only 7% of OSSHE families and 2% of c.c. families.
- 56+60 Among the 40% of OICA's stdnts. who are independent, nearly half are full-time, and 41% of these full-time independent stdnts. are also *employed* full-time (compared to only 19% OSSHE and 18% at c.c. instis.) Another 18% are employed at least 16 but less than 40 hrs/wk. (pg. 86) and another 17% are partially employed below 16 hrs/wk.
- 78 Borrowing is *vastly* higher for independent stdnts. at OICA instis. compared to OSSHE and c.c.'s
- 82+83 Similar note as for page 41.

The number of Pell grants in 2005-06 as a percentage of the total 12- month undergraduate enrollments in 2005-06 as reported on the FISAP. Calculated as the number of Pell grants divided by the 12-month enrollment reported in the FISAP. At colleges with large percentages of part-time and part-year students this will be substantially lower than Pell grants as a percentage of fall enrollment, which uses only the fall enrollment in the denominator.

The number of Pell grants in 2005-06 as a percentage of the total Fall 2005 undergraduate enrollments. Since the numerator (Pell grants awarded at any time in the 2005-06 academic year) and the denominator (enrollments in only the Fall term) measure different time periods, this will be higher than the number of Pell grants as a percentage of the unduplicated 12-month total enrollments reported in the FISAP.
